Description

In order to automate experiment execution (via FSMT for instance) I would like to have a job template that allows to execute experiments on the CI Server.

The template can be pretty much copied from the "freestyle" template but it must not be included in the build flow.

Associated revisions

Revision 3e408be5 - 2014-12-01 17:17 - Jan Moringen

Improved builder ordering in templates/*{tookit,maven}.template

refs #333, refs #307, refs #344

- templates/T001-toolkit.template: pre-build-hook before <all> and before git
- templates/T200-maven.template: maven.prepare-version before maven; maven.deploy-dependencies after maven
