Description			
I cannot make sense out of this (didn't google it)			
BUG:			
failed AVER: (< I 2)			
This is probably a bug in SBCL itself. (Alternatively, SBCL might have been corrupted by bad user code, e.g. by an undefined Lisp operation like (FMAKUNBOUND 'COMPILE), or by stray pointers from alien code or from unsafe Lisp code; or there might be a bug in the OS or hardware that SBCL is running on.) If it seems to be a bug in SBCL itself, the maintainers would like to know about it. Bug reports are welcome on the SBCL mailing lists, which you can find at < http://sbcl.sourceforge.net/ >.			

History

#1 - 2014-03-17 17:06 - Jan Moringen

- Description updated

Meta-comment: use <pre>...</pre> (without the spaces) for multi-line preformatted text.

#2 - 2014-03-17 17:06 - Jan Moringen

- Status changed from New to Feedback

Can you run the generator with the --debug commandline option and attach the resulting backtrace?

#3 - 2014-11-18 19:03 - Jan Moringen

Should be fixed in 0.3 and later (for some time).

#4 - 2015-01-09 16:55 - Jan Moringen

- Status changed from Feedback to Resolved

- % Done changed from 0 to 100
