<b>Description</b>			
A formal json specification a-la <a href="https://pypi.python.org/pypi/jsonschema">https://pypi.python.org/pypi/jsonschema</a> for the metadata in the repository would really help formal validation tools and generating templates for adding metadata to the repository. It will also help future-proof the repository as it will make conversion easier. Also, the documentation for this package would be the appropriate place to discuss formal and informal requirements for what makes a good metadata file.
