

## Cognitive Interaction Toolkit - Bug #494

### number values need to be parsed from string

2017-01-19 13:33 - Robert Haschke

<b>Status:</b>	Resolved	<b>Start date:</b>	2017-01-19

<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
<p>In a similar fashion as you handle booleans now, you need to parse number values (and possibly other values) from strings when you expect a number. Defining</p> <pre>"junit.health-scale-factor": "\${next-value 1.0}"</pre> <p>causes the following error:</p> <pre>DEPLOYMENT-ERROR: Error during deployment of #&amp;lt;PROJECT urdf {100DFE38C3}&amp;gt; » #&amp;lt;VERSION urdf:kinetic-devel {100E0F4373}&amp;gt; » #&amp;lt;JOB urdf:kinetic-devel:toolkit {100E115773}&amp;gt; Caused by: &gt; The value "1.0" cannot be interpreted as a value of type (OR NULL ALEXANDRIA.0.DEV:POSITIVE-REAL).</pre>			

### History

#### #1 - 2017-01-19 13:34 - Robert Haschke

- Category set to build-generator
- Assignee set to Jan Moringen

#### #2 - 2019-01-16 11:19 - Jan Moringen

- Status changed from New to Resolved
- % Done changed from 0 to 100

This should work everywhere now. If there are still instances of this, please file a new issue.
