Description			
Moving the make	file evetom ourrently used for t	ha ialPraiaata ta an subpraiaat with a san	arata sun ronza would have two advantages:

Moving the makefile system currently used for the iclProjects to an subproject with a separate svn-repro would have two advantages:

1. it would be usable without the ICL installed

2. it would be possible to use 'svn up' to benefit from newer versions of the makefile in already existing projects
